FINE ROSE GARDENS

Hillsdale Nursery Super-Market

Here at our main nursery we now operate a modern self-service Super-Market Nursery Store. For many years it has been felt that there was a need for such a self-service store in connection with our nursery business.

In this new store, all items are plainly priced and the merchandise is conveniently packaged and placed for handy cash-and-carry purposes. Roses and dormant shrubs are all root-wrapped and priced.

We also carry here a large stock of many different brands of Insecticides and Fungicides; Fertilizers (organic and inorganic) and Plant Foods; Peat Moss; Potting Soils; Grass and Lawn Seed, and a full line of garden needs.

Various flowering bulbs are available in season, also perennial and vegetable plants.

We invite all our customers and friends to "SHOP THE MODERN WAY" here at HILLSDALE NURSERY SUPER-MARKET.

Branch Nursery

We maintain a branch store at 4700 Allisonville Road (State Road 37). Here we sell nursery stock and garden needs for the convenience of our many customers in that vicinity.

LANDSCAPE DESIGN DEPARTMENT

We maintain a thoroughly trained landscape organization whose members, after years of study and invaluable practical experience, have attained rare skill in the designing and planting of gardens, both large and small, of unusual beauty and merit. We want all of our customers to realize that we consider no job too small or too large to command our best efforts and finest skill.

Without charge or obligation we will have one of our experts visit your grounds. He can give you an estimate of the small charge for preparing your plan. This plan will include a list of the proper plants required to produce the effects you desire. Also, it is so prepared that you may complete the planting at one time, or spread it over a period of years. It will show the proper location of the house, drives, walks, pools, benches, pergolas, terraces and of every plant. The value of such a plan must be apparent to everyone.

LANDSCAPE SERVICE DEPARTMENT

The members of our landscape service department are thoroughly trained and experienced in all phases of landscape construction, planting and service. And their equipment is the newest and most modern machinery available. The methods used by our men are those ways which we have found to result in the highest quality work.

An Invitation to Hillsdale

Here at our nursery we have one of the largest and most beautiful rose and rock gardens in Indiana. Extensive ornamental shrub and evergreen plantings, and spacious perennial and rose gardens are maintained for the enjoyment of our friends and customers. We cordially invite you to visit them at any time; they will give you new ideas for making your own gardens more satisfying.

LOCATION

The Office, Main Nursery and Super-Market are at 7800 Shadeland Avenue (Rd. 100), which is approximately 8 miles northeast of Indianapolis.

To reach us by motor from Indianapolis, take Fall Creek Boulevard, North Drive, at the intersection of Road 37 and Keystone Avenue; proceed to Millersville and continue on the Boulevard to $\frac{1}{2}$ mile beyond broadcasting station, to intersection with Shadeland Avenue or State Road 100; turn left on Shadeland Avenue and continue $1\frac{1}{2}$ miles to Hillsdale Nurseries.

A second route is to drive out on the Noblesville Road, which is now Road 37, to Allisonville, turn right (that is, east) on 82nd Street, which is State Road 100 junction at Allisonville and proceed $1\frac{1}{2}$ miles to Castleton to Hillsdale Nurseries; or take any through street north of Indianapolis to Road 100, turn east on Road 100 to Nursery. East section of Indianapolis, take any through street east to Road 100 and follow Road 100 north to Nursery.

For your convenience, we are operating our Branch Nursery, which is located on the Noblesville Road 37, just north of 46th Street. Here you will find personnel and equipment capable of filling small retail orders quickly and efficiently.

PLEASE READ CAREFULLY

DIRECTIONS FOR ORDERING: Write name and address plainly and advise time and method of shipment desired; otherwise we will use our best judgment.

We accept orders on condition that they shall be void should injury befall them from frost, hail, fire or causes beyond our control.

PRICES AND DELIVERY: Prices in this list cancel all previous prices and quotations. These prices are subject to change without notice and they apply only to stock available on receipt of order. Prices given in this list are F.O.B. Castleton, Ind.

Higher prices will be charged for specimens of higher quality selected by the customer or his representative.

These prices do not include packing costs; all packing and boxing expense will be charged at cost.

Prices of plants marked "B&B" include price of balling. Plants not marked "B&B" are bare-rooted, and an extra charge is made for balling these, should balling be required. (See B&B Schedule.) An extra charge is made for balling deciduous plants not marked "B&B," either in dormant season or in full leaf for summer planting.

Prices include delivery charge on orders for \$30.00 or more, to customers within ten miles of our nursery. Cost of delivery by truck to more distant points will be quoted upon request. For all special-trip local orders under \$30.00, a delivery charge of \$2.50 is made. Arrangements can be made for distance deliveries by motor truck.

TERMS: Cash with order, except to customers who have established an account with us, in which case we allow a 1% discount for cash in 10 days from date of invoice. All charge accounts are due within 30 days from date of invoice, on net basis.

GUARANTEE: Our nurseries are frequently inspected and intensively sprayed or dusted. We guarantee our plants to be true to name and size specified, up to grade, full count, and in good healthy condition when they leave our nurseries.

We use the greatest care to have all our trees and plants true to name and will replace any that prove untrue, or will refund the purchase price.

Because of the perishable nature of nursery stock and the fact that we have no control over the treatment and care of nursery stock after it leaves our hands, we give no warranty, expressed or implied, as to growth or productiveness of fruit and bloom of the nursery stock that we sell. We cannot guarantee plants to live that are not planted by us, as we have no control over the method by which they are planted or the conditions under which they are grown. Plants are living organisms and their success depends upon the care you give them.

REPLACEMENT GUARANTEE FOR STOCK

WE PLANT: All plant material, except perennials and annuals, furnished and planted by our landscape department and given proper care by the owner, is guaranteed to grow and thrive satisfactorily for one year from date of planting. Any plants which fail to survive within sixty days from date of planting will be replaced once without cost. Dormant plants must leaf out the following spring and continue in growth until June 15. Plants failing to survive after the sixty-day period, but within one year from date of planting, will be replaced once at one-half the original planted price, except roses, which we replace free only when they die the same season in which they are planted. We do not guarantee our roses to live through the winter, and no replacement will be made when roses are injured by frost or winter-kill.

Our method of handling and packing stock is modern, and goods will be in good condition and well packed when they leave our hands. All our products are shipped at the purchaser's risk. Our responsibility ends upon delivery to the carriers.

CLAIMS: All claims for errors must be made within six days after receipt of goods, or they positively will not be considered.

If goods suffer through delay or damage in transit, claim should be made at once to the agent of the transportation company at the point of delivery.

Evergreens

Our evergreens are carefully grown and generously spaced to allow symmetrical development. They are root and top pruned into handsome, shapely specimens that will transplant successfully with ordinary care. We dig all our evergreens with balls of earth and wrap them in burlap without additional charge. Height following name indicates size when fully grown. Sizes priced indicate height unless spread is specified.

ORIENTAL CHERRIES, Kwanzan

Only those who have visited Washington, D. C., during the spring—who have seen the famous planting along the Potomac—can realize the fairyland of beauty presented by hundreds of these Cherries in full flower. No words can do justice to such a sight, for its splendor literally takes one's breath away.

FLOWERING TREES

Here are pictured just a few of the
deciduous trees that bear showy
flowers. They make excellent accents
on the lawn and are sure to be a high
spot when they bloom. By all means,
use some on your grounds—no matter
how large or small a space you have.

PEONIES

Peonies, like Lilacs, are among the old-time flowers that the pioneers took with them as they pushed westward. Their hardiness and dependability have endeared them to generations of garden lovers, and as they go deeper into the soil they seem to establish the roots of home.

J. H. HALE

Home-grown fruit tastes so good that it seems every home owner should have a few trees of his own, with a berry patch nearby. For dessert, for freezing and preserving, for between-meal snacks, there is nothing so wholesome and satisfying as fruit. See pages 55 to 58.

DELPHINIUM
Giant Pacific Hybrids

These monarchs of the perennial border provide much-needed blue tones at the height of the early summer season. This is a fine improved strain.

Plant Large Trees

SAVE 10 TO 25 YEARS
OF WAITING

We are now able to offer the use of one of the largest types of automotive tree movers available today. With this modern machine we can successfully transplant mature trees up to 12 inches in diameter in the most efficient manner.

The planting prices quoted here include moving with a large ball of earth, planting, guying, staking and wrapping. They are, however, subject to deviation, dependent upon conditions at point of locations.
